

## CompuNet Offers COVID-19 Pfizer BioNTech Vaccines at Select Locations

### *Third dose Pfizer now available for immunocompromised individuals*

**September 3, 2021:** CompuNet Clinical Laboratories has added the Pfizer BioNTech third dose vaccine to its vaccine options for individuals with immunocompromised conditions identified by the Centers for Disease Control & Prevention (CDC). The third dose, along with the first and second Pfizer dose, is available at five CompuNet patient service centers throughout the Dayton area.

“Our plan is to continue providing the Pfizer COVID vaccine as additional doses are recommended by the FDA,” said Teresa Williams, chief operating officer for CompuNet. “We are excited to not only offer the two initial Pfizer vaccine doses but also the third dose for immunocompromised individuals.”

CompuNet also plans to offer the Pfizer COVID-19 vaccine booster once the FDA recommends administration of a vaccine booster.

The Pfizer COVID-19 vaccine is administered by a nurse, and the patient is asked to wait for a period of time after the shot is given so that staff can monitor for any adverse reactions. CompuNet will schedule the follow-up second vaccine dose appointment while the patient is waiting after their first dose. First, second, and third dose Pfizer vaccine appointments for immunocompromised individuals can be scheduled at [www.compunetlab.com](http://www.compunetlab.com).

The Pfizer COVID-19 vaccine is available to adults and minors, ages 12 and over. A parent or guardian will be required to be present and sign a consent form for patients ages 12 to 17.

Appointments should be scheduled at CompuNet’s website, [www.compunetlab.com](http://www.compunetlab.com). However, patients can request the vaccine while they are visiting one of the five locations for lab services. To receive the vaccine, individuals are not required to be a CompuNet patient.

Please note that individuals will not incur a cost for the vaccine; however, their insurance plan will be billed.

### **PFIZER COVID-19 VACCINE COMPUNET LOCATIONS**
