

Injury or Pain Slowing Down Your Patient? Get Them Back in Motion

Sports Medicine Care from Premier Orthopedics

Whatever their age or skill level, we support athletes and active adults with personalized, comprehensive treatment plans. Our goal is to get your patients back to the activities that matter most to them.

Experienced Specialists

Premier Orthopedics is one of the largest and highly trained orthopedic and sports medicine groups in Southwest Ohio. Our team includes board-certified and fellowship-trained specialists in complex musculoskeletal challenges. You can trust your patients to the same doctors and surgeons who care for the University of Dayton Flyers, Wright State Raiders, and many area high school athletes.

Advanced Treatment Options

Our practice offers patients advanced treatments for every stage musculoskeletal care, including:

- Non-surgical approaches, including physical therapy, exercise, and injections that can help the body heal damage and relieve pain
- Platelet rich plasma (PRP) and stem cell injections for joint pain management
- Matrix-induced autologous chondrocyte implantation (MACI) transplant, a two-step surgical procedure using the patient's own cartilage, to reduce pain and preserve knees
- Advanced, minimally-invasive surgical procedures to repair complex, acute injuries, like all-inside ACL repair and rotator cuff tears

Quick, Easy, Convenient Access

We offer many convenient ways for your patients to be seen by a specialist as quickly as possible — often same day or next day.

- Walk-in appointments are available at select offices.
- Online scheduling allows patients to select a time and location best for them.
- You can fax a referral form to an office that's convenient for your patient.
- Referrals can also be sent through Epic to our central referring center. Patients will be matched with a first-available provider at a convenient office.

Easy to Refer

Epic offices can search **Premier Orthopedics** in the order search box. Non-Epic offices can fax referrals to:
