We're a Team with One Goal:

To Provide Each Patient with the Best Possible Orthopedic and Sports Medicine Care

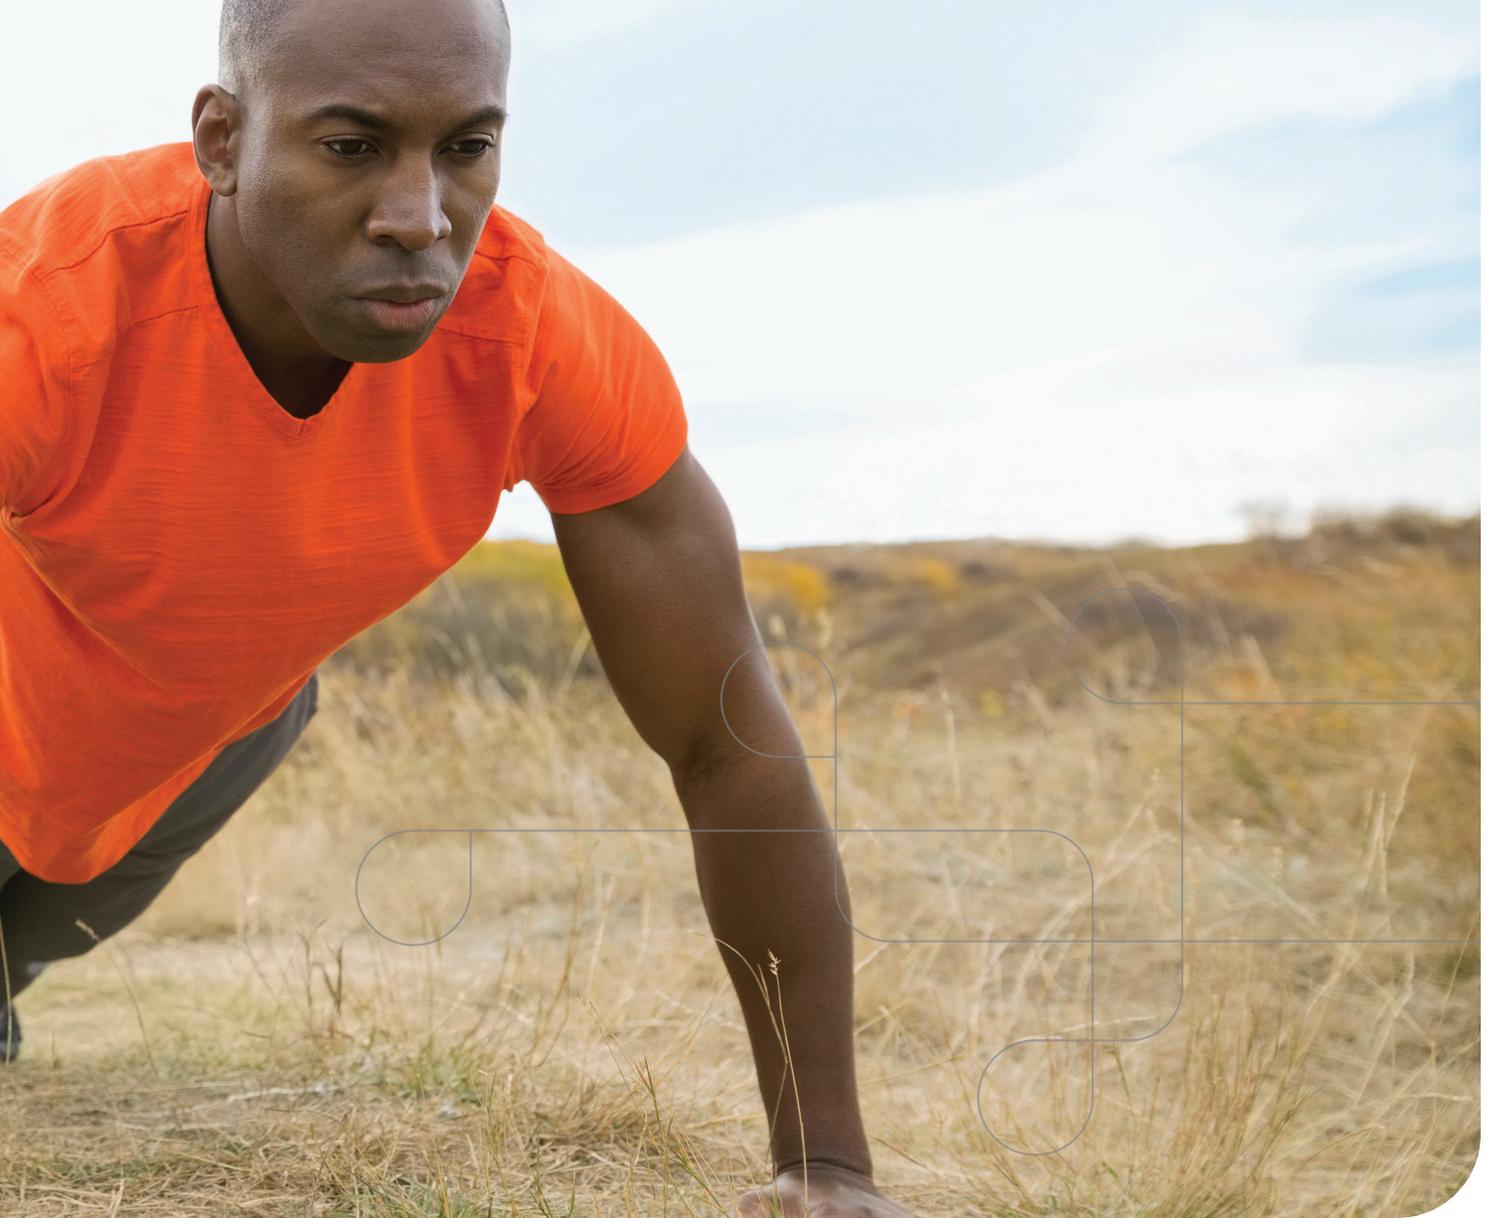

Our entire team at Premier Orthopedics specializes in helping your patients stay in step with the activities that matter most to them.

Whether your patient is experiencing joint or spine pain or has had a sudden sports or work injury, Premier Orthopedics physicians bring advanced training and experience to our comprehensive orthopedic and sports medicine care. That means we can call on a broad array of skilled expertise to create a care plan uniquely designed for your patient's body, goals and life.

Our practice welcomes patients of all ages - from active youth, to competitive athletes, to weekend warriors, to hardworking adults, to victims of birth defects or trauma, and to seniors with a lot of miles on their muscles, bones, and joints still to go.

Our team - one of the largest and highly trained orthopedic and sports medicine groups in Southwest Ohio - includes board-certified and fellowship-trained specialists in complex musculoskeletal challenges. We offer the full range of treatment options from exercise and physical therapy to injections, pain management, and surgery, where needed, including minimally-invasive arthroscopic procedures.

With nearly 30 doctors and more than 12 locations, we are ready where and when your patients need our help.

Commitment to our Community

Our Premier Orthopedics physicians choose to practice here because this is home. We know our communities, and we know our patients.

We are proud that the University of Dayton Flyers, the Wright State University Raiders, the Edison State Community College Chargers, and nearly 40 area high schools trust the professionals of Premier Orthopedics as their team physicians.

There When and Where You Need Us

When something hurts, our team understands there isn't time to lose. That's why we offer many convenient ways for patients to be seen by a specialist as quickly as possible - often same day or next day.

Walk-in appointments are available at select offices. Please visit our website for locations and hours.

Online scheduling is available on our website for patients to select a time and location best for them.

Referring offices can fax a referral form to an office location convenient for the patient. Referrals can also be sent through Epic to our central referring center, and patients will be matched with a first-available provider at an office convenient to reach.

The board-certified and fellowship-trained physicians of Premier Orthopedics collaborate to design a unique care plan for each patient.

Why Choose Premier Orthopedics?

Sports Medicine: Keeping Youth and Adult Patients in the Game

We support athletes in a wide range of ages and athletic goals – from injury prevention to injury recovery. Care usually starts with non-surgical approaches, including physical therapy, exercise, and injections that can help the body heal damage and relieve pain from arthritis, aging and injuries to joints, tendons, ligaments and muscles.

If your patient's goal is getting more from their workouts or helping their young athlete reach peak performance, we can help them get there. Let us guide your patient or young athlete through an individualized assessment to address the pillars of sports performance: nutrition, hydration, sleep, and psychology.

When surgery is your best option, our board-certified and fellowship-trained surgeons offer advanced procedures that can get your patient back to their life and activities sooner. Many procedures are minimally invasive, and most surgeries are done as an outpatient.

Joint Pain: Individual Care Plans from Joint Preservation to Joint Replacement

We know that joint pain is as individual as your patient is. We'll listen, assess the situation, and create a care plan with the most suitable options for your patient. From injections, to joint preservation procedures, to total joint replacements or revisions, our large team of specialists help patients navigate seamlessly from non-operative care to surgery, when needed.

You can rest assured that our team is experienced at performing procedures for all joint problems. Our surgeons routinely use research-based treatment methods and employ advanced technology, including robotics, to enhance precision in joint replacement. Additionally, we offer advanced, minimally invasive total joint arthroscopy.

Spine: Advanced Care for Back and Neck Pain

When your patient's life is slowed down or stopped entirely because of back and neck pain our Premier Orthopedics spine specialists are here to thoroughly assess their spine to understand the source of their pain. We work with your patient to define their goals and then create a treatment plan. When surgery is the best option, we offer advanced, minimally invasive procedures.

Trauma: On Call for Breaks, Fractures, and Critical Orthopedic Injuries

Our experienced orthopedic trauma surgeons are on call to treat critical orthopedic injuries, 24 hours a day, seven days a week. They offer office hours at our Miami Valley Hospital location. Additionally, they are regularly on call at Miami Valley Hospital's Level I Trauma Center, the only one in the region, which provides the highest level of care for the most critically injured patients in Southwest Ohio and East Indiana.
